FOUNDATION ADVISORY: Foundation cracks, problems or failures may be a result of many factors including but not limited to chemical compositions in foundation materials or natural occurrences at any time during the life of a property. Reports of issues with concrete foundations in some residential homes and condominium complexes in Connecticut prompted the State of Connecticut’s Department of Consumer Protection (DCP) to develop information for consumers and to conduct an investigation to identify the extent and scope of the issue, as that is not fully identified. Professional Engineers can provide guidance and expert assistance into aspects of foundation problems and concerns.

The DCP information for consumers on concrete foundations may be viewed online and printed from the DCP website, <http://www.ct.gov/dcp>, search “concrete foundations”. **That official information continues to be updated by DCP as new information becomes available**, and includes the latest update on the state investigation into the cause of the crumbling foundations, a brochure with pictures of visible foundation cracks, how to verify a Professional Engineer license, insurance information, and other information they have determined is important for consumers to know about and related to concrete foundations. Additional information can also be found at Connecticut’s Department of Housing (DOH) website, <http://www.ct.gov/doh>, search for “concrete foundations”. **Consumers are strongly encouraged to check regularly for the latest updates at the DCP and DOH websites.**

NOTICE TO BUYER: Seller(s) disclosures contained herein are specific to providing knowledge and results of any testing, inspection or repairs related to a foundation on the property. Claims funds may be available through the Connecticut Foundations Solutions Indemnity Company, Inc. (CFSIC) for residential dwellings purchased on or after February 1, 2019 which meet certain eligibility and professional inspection requirements.
